Scranton, PA 18503

Dear Mr. Munley,

I'm writing to inform friends, clients, and those of you who work in the heavy vehicle litigation field about a "new" book coming out this summer. I had the privilege of co-editing the book for the American Bar Association and also wrote several chapters that address many issues involved in the operation of commercial vehicles.

The book is entitled *Truck Accident Litigation, Second Edition* and is soon to be released as an ABA featured book for 2006! The book is filled with information for the seasoned truck accident litigator and the novice alike. Insightful chapters were written by both plaintiff and defense bars, as well as truck accident consultants and professionals from the trucking industry. It really is an A to Z book that offers something for everyone; I sincerely believe you will find this book to be a valuable resource in your practice. Pertinent ordering information can be found on the enclosed flyer.

I have had the opportunity to work and testify on some very interesting cases in the past year. I often found that details that can easily be overlooked during the case workup turned out to be the golden nuggets that greatly influenced the settlement of the case. I would be happy to share some of these special moments and experiences with you personally.

I have many colleagues at Ruhl Forensic who work in a variety of specialties. All of our staff specialties and curricula vitae are available at www.ruhl.com. If you have any questions or if we can be of assistance to you, please feel free to give us a call. We look forward to speaking with you.

Sincerely,

Ruhl Forensic, Inc.

Anita M. Kerezman, CDS
Commercial Vehicle Operation and Safety Specialist

Enclosure: *Truck Accident Litigation, Second Edition* information

Truck Accident Litigation, Second Edition

This book is unique in that it combines the expertise of a multitude of industry professionals, engineers and reconstructionists with experienced litigators to provide useful insights and information into the investigation and litigation of a truck accident case.
